

Pool Cover Pumps - 3000 GPH 1/4 HP Auto Pool Cover

Item APC4000A

DESCRIPCIÓN DEL PRODUCTO

This pump automatically removes accumulated water from the tops of pool covers or most areas that accumulate standing water and discharges it from a hose fitting. This prevents water from becoming too heavy and straining the pool cover causing damage. It is constructed of durable thermoplastic for years of trouble free service. These swimming pool cover pumps are designed for use on above ground or in-ground pool covers. Designed to pump an impressive 3000 gallons per hour, the APC4000A pool cover pump easily attaches to a standard garden hose for effortless water removal.

CARACTERÍSTICAS

- Top carrying handle for easy placement
- 1-1/4" Adapter included

APLICACIONES

- Piscinas y spa enterrados y elevados

DATOS TÉCNICOS
