

Pool Cover Pumps

G Series and WATERSPIDER® Series

(APC4000A/APC2000) and (APSPIDER400/APSPIDER400A)

Above-Ground / Inground Pools

Say Goodbye to Excess Water

Quickly remove excess water from any pool cover with a submersible Pool Cover Pump from Intermatic. These simple and efficient solutions connect to a standard garden hose and make it easy for homeowners to get ready for pool season.

Select pool cover pump models include a unique spider design, which provides a stable leg base for enhanced performance. All submersible pool pump covers include a leaf screen and 25 ft cord to accommodate a variety of water removal applications.

G SERIES
Pool Cover Pump

WATERSPIDER® SERIES
Pool Cover Pump

Intermatic **Pool Cover Pumps** help prepare for pool closings and prevent accumulated water!

Choose the **Cover Pump** That Meets Your Needs

G Series

Simple and efficient, our G Series Pool Cover Pumps high-flow design supports a variety of water removal applications including excess water from above-ground and inground pool covers. This can help prepare for pool openings and prevent accumulated water from straining pool covers in the off-season. All G Series solutions are constructed with durable thermoplastic materials and connect using a standard garden hose.

Submersible cover pumps easily attach to a standard 3/4" garden hose connection

Top side carrying handle allows for easy placement

Includes 1-1/4" adapter

A removable leaf disk and stable base with rollers makes it easy for users to move the pump around the pool cover using a rope (APC4000A)

Automatic switch design with no moving parts for effortless activation*

Small base fits into 8" sump pump traps (APC2000)

Vertical discharge with multiple connections for easy setup at job sites (APC2000)

WATERSPIDER® Series

Blending performance and stability, our WATERSPIDER Series Pool Cover Pumps remove water from the surface using a unique multi-legged design. Suited for both above-ground and inground pool covers, these solutions pump an impressive 400 gallons per hour, allowing for quick removal of accumulated water in a wide range of applications. All WATERSPIDER Series solutions include an easy-to-clean mesh intake screen for added convenience and connect using a standard garden hose.

Unique "spider legs" design promotes pump stability and ease of operation

Easily attaches to a standard 3/4" garden hose connection

Includes reusable mesh intake screen to limit blockages

Removes water down to surface
