

EI-501 Series

7-Day Programmable Timer

The Everyday Astronomic Timer That's Built to Perform

Bring convenience and energy savings to residential and light commercial projects with the EI-501 Series In-Wall Timer from Intermatic. Balancing simplicity and performance, our standard tier solution stands out for its robust Astronomic scheduling options, automatic DST adjustment, and 3-way switching compatibility. EI-501 Series Timers allow for up to 40 ON/OFF events and are the perfect choice for entryway lighting, garage lights, landscape lights, and more – neutral wire required.

EI-501-WK*

7-Day Programmable Timer

*Wall plate not included.

FEATURES & BENEFITS

- **7-Day Astronomic Scheduling** – Create convenient 7-day ON/OFF schedules with up to 40 events (20 programs), including events at Astronomic dawn and dusk.
- **Auto DST Adjustment** – Built-in Daylight Saving Time feature adjusts schedules based on location during annual time changes.
- **Countdown Functionality** – Use the EI-501 Series as a countdown timer to turn lights and loads OFF at a preset interval.
- **Flexible Installation** – Timer supports ½ HP motor load applications and can be installed in single-pole and 3-way configurations.
- **Modern Interface** – A modern 8-button design with easy-to-use LCD panel makes scheduling a breeze for homeowners of all technology backgrounds.
- **Swappable Faceplates** – Match indoor décor with swappable white and light almond faceplates*.

APPLICATIONS

The EI-501 Series supports CFL, Fluorescent, Incandescent, and LED loads up to 15 A loads and offers a motor load rating of ½ HP.
